

To add an ebook file to your Kindle, either connect your Kindle to your computer via USB and drag and drop the file to the Documents folder, or send the ebook as an email attachment to your Kindle's designated email address.

## 1. Drag and Drop (USB Connection):

- **Connect your Kindle:**

Plug your Kindle into your computer using a USB cable.

- **Navigate to the Documents folder:**

Find the "Documents" folder on your Kindle, usually in "Internal Storage" or "Device" directory.

- **Drag and drop:**

Drag and drop the ebook file (e.g. .mobi, .azw, .pdf) to the "Documents" folder on your Kindle.

- **Eject safely:**

Once the transfer is complete, be sure to safely eject your Kindle from your computer.

## 2. Email Attachment:

- **Find your Kindle's email address:**

Log into your Amazon account and navigate to "Manage Your Content and Devices" > "Devices" > your Kindle device. Your Kindle email address will be listed there.

- **Send the ebook as an attachment:**

Compose an email with the ebook file as an attachment and send to your Kindle's email address.

- **Kindle sync:**

Ensure your Kindle is connected to Wi-Fi and synced to receive the new book.

## Additional Notes:

- **File formats:**

Kindle devices natively support .mobi, .azw, and .pdf files. If you have an .epub file, you might need to convert, or try sending it as an email attachment with the subject line "convert".

- **File size:**

Be aware that email attachments may have size limits, so larger files may not work.

- **Kindle app:**

You can also add ebooks to your Kindle app on other devices using the "Send to Kindle" feature. On [amazon.com/sendtokindle](https://amazon.com/sendtokindle), click Select files from device and select the book you want on your Kindle.
